CURRENT LOCATION PERMISSIONS

Just add this in info.plist

These all are current location permissions

NSLocationAlwaysUsageDescription --- I need Location
NSLocationWhenInUseUsageDescription --- I need Location
privacy - location usage description --- I need Location

https://stackoverflow.com/questions/25916841/cllocationmanager-startupdatinglocation-not-calling-locationmanagerdidupdateloc

```
locationManager = [[CLLocationManager alloc] init];
locationManager.delegate=self;
locationManager.desiredAccuracy=kCLLocationAccuracyBest;
locationManager.distanceFilter=kCLDistanceFilterNone;
[locationManager requestWhenInUseAuthorization];
[locationManager startMonitoringSignificantLocationChanges];
[locationManager startUpdatingLocation];
Now it will call your didUpdateToLocation definitely.
```
