SKILLS

Languages: Objective C, Swift.
Development Software: XCode 6+.

Operating System: Mac OS X, Windows.

Technologies: iOS Development.

Skill: Having a hands on experience with UIKit, Foundation framework, Push Notification, SQLite,Core Location ,Google APIs, AutoLayout, Core Data, Core Animation, Core text, Understanding of JSON and consuming Web Services, Automation testing in Appium (using JAVA).

Project Management Tools : Redmine, Applane

CORE QUALIFICATIONS

- Superior proficiency with XCode IDE and iPhone SDK
- Profound experience with Objective-C on Mac OS X XML JSON
- Strong record developing apps for iPad and iPhone
- Appium Automation using Java.
- High skills in developing UI for media applications
- Good knowledge of interaction with web service APIs
- Firm background in object-oriented designing and programming skills

PROJECTS

Project 1:   Activity BarCoding (iOS Application) (Phase 1 & Phase 2)

Role: Application development, UI development and maintenance
Duration: July 2015 - October 2015.

Description: ABC uses a low-cost battery operated, portable barcode scanner (size of a matchbox) which records up to 5000 codes and includes a timestamp. The software system then analyses the stream of barcodes to assemble an activity profile of the professional, and track the interventions that happen to the patient. It generates a suite of reports by staff member, by patient, by referring department, and by activity type.

Language : Objective C
