Frameworks	Cocoa Touch, Cocoa Pods, Foundation framework
Design Pattern	MVC, MVP,MVVM, Singleton

Professional Experience

Organization	Designation	Duration
[REDACTED]	Sr. IOS developer	Sep 2019 – Till now
[REDACTED]s	IOS developer	March 2018 – Sep 2019

Projects Handled:

Project#1 :- **YesSpree**
Duration :- July 2017 - Feb 2019
Team Size :- 2

Environment :- Swift , REST API, JSON, XCode, iPhone SDK

Project Description

YesSpree is India's First Rural Online Grocery store. It provides a handy way to shop a variety of products and deliver them to your doorstep. It has all different types of Grocery and consumer products.

Role and Responsibilities:

- Design and Development
- Implemented using MVC Architecture
- Alamofire to handle JSON response from server
- Firebase Cloud Messaging for Push Notification
- Shared Preferences to handle local data
- Testing and Debugging
- Facebook sign in
- Google sign in

App Store Link: <https://itunes.apple.com/us/app/yesspree/id1448009125?mt=8>

Project#2 :- **USM HRMS**

Team Size :- 2

Environment :- Swift , REST API, JSON, XCode

Project Description

This application is accessible to all USM Group employees to view their daily attendance, apply leaves, Onduty, Work from Home and Travel request and many more..,

Role and Responsibilities:

- Design, Development and Maintenance
- AFNetworking to handle JSON response from server
- Implemented using MVC Architecture

Link: <https://itunes.apple.com/in/app/usm-hrms/id1327938646?mt=8>

Project#3 :- **Cedees**

Team Size :- 2

Environment :- Swift , REST API, JSON, XCode

Project Description

C|E|D|E|E|S®, is an educational institute which provides a comprehensive 15-months long classroom coaching for post graduate aspirants in the field of dentistry. Centre for Excellence in Dental Entrance Examinations. "The idea of education is to unsettle the minds of the young and inflame their intellects".

Role and Responsibilities:

- Understanding the requirements of the current project.
- Google maps integration and Location tracking.
- Designing the views using interface builder.
- Adding Constraints and Auto layouts fit on all iPhone's.
- Involving development of data delegate coding. Making connections, gestures and Application
- Coding.
- Bug Fixes and Improvement of the application.
- Implemented the core Animation for onboarding Views.
- Releasing the app into Testflight, etc.

Project#4 :- **o2cycle**
Team Size :- 3
Environment :- SwiftUI , REST API, JSON
Project Description

This special design gives you as a rider, greater access and convenience to a bike when you need it the most.

Role and Responsibilities:

- Design and Development from scratch
- Implemented using MVC Architecture
- Alamofire to handle JSON response from server
- Google map integration.
- Implemented Scanner.
- Gif implementation.

Project#5 :- **TOM(Timesheet On Mobile)**
Client :- ITC infotech(internal project)
Duration :- Nov 2019 - Mar 2020
Team Size :- 5
Environment :- Swift , REST API, JSON, XCode

Project Description

The main purpose of this application is to fill the timesheet of ITC infotech employees on the mobile phone

Role and Responsibilities:

- Design, Development and maintenance.
- Implemented application using agile methodology
- Testing, debugging, writing unit test cases.
- Followed MVC design pattern.

Project#6 :- **JHU- Covid 19**
Client :- Ampro
Duration :- 25/05 /2020 - 01/07 /2020
Team Size :- 3
Environment :- Swift , Core data, JSON, XCode,MVVM,Fire base

Project Description

Development of Mobile app for Johns Hopkins University to help them out in their study related to COVID-19. This app will enable users to enter and submit their Temperature and Symptoms.

Role and Responsibilities:

- Design, Development and maintenance from scratch
- Implemented application using agile methodology
- Testing, debugging, writing unit test cases.
- Followed MVVM design pattern.

Declaration:

I hereby declare that all the above statements mentioned are true to the best of my Knowledge and belief.
