Work Experience

Senior Mobile Developer at **Cummins Inc.**

November 2020 - Present

Pune, Maharashtra

- **Guidanz** - This is mobile app used by service engineers which acts as a tool to communicate with engines (manufactured by Cummins) via ECM and adapters. It has various features like scanning faults, performing calibration etc on engines. My role is to support and develop iOS and C++ module.

Mobile Developer L2 at **Publicis Sapient**

October 2019 - October 2020

Gurgaon, Haryana

- **US bank** - This project is a banking app including all the features related to managing accounts and money transfer and marketplace. Currently, my role is to create and develop iOS 14 widgets using SwiftUI. Also did cocoa pods development - separating out different modules into their own pods and integrating those pods into the project.
