

TestComplete Training Course

Content

1. Overview of TestComplete

1. About the IDE
2. Project Workspace Tab
3. Project Explorer
4. Project Suites and Projects
5. Project Items
6. Workspace
7. Object Browser Tab

2. Introduction to Keyword-Driven Testing

1. What is Keyword-Driven Testing?
2. Creating Keyword Tests
3. Recording from the Start Page
4. Recording from the main Test Engine Toolbar
5. Recording from the Keyword Test Editor
6. Creating Keyword Tests from the Project Explorer
7. About the Recording toolbar
8. About the Keyword Test Editor
9. Test Steps Tab
10. Variables Tab
11. Parameters Tab
12. Using Variables and Parameters
13. Playback of Keyword Tests
14. About the Log Window
15. Test Log Options

3. Editing Keyword Tests

1. TestComplete Keyword-Driven Testing Made Easy
2. Editing Keyword Test Steps
3. Editing Test Step Columns

4. Working with Operations
5. Adding Operations to a Test
6. Adding Conditional Logic
7. Error Handling
8. Error Handling Operations

4. Using Stores & Checkpoints

1. About Stores & Checkpoints
2. Checkpoint Wizard
3. Creating Checkpoints
4. Checkpoints
5. Selecting an Object
6. Property Checkpoint
7. Recommended Usage
8. Object Checkpoint
9. Using Groups within an Object Checkpoint
10. Modifying an Existing Object Checkpoint
11. Region Checkpoint
12. Recommended Usage
13. Table Checkpoint
14. File Checkpoint
15. Recommended Usage
16. XML Checkpoint
17. Updating Checkpoints

5. NameMapping and Aliases

1. Understanding NameMapping
2. Benefits of Name Mapping
3. Automatic Name Mapping
4. Creating NameMappings
5. Using NameMapping Editor
6. Modifying a Name Mapping
7. Leveraging Name Mappings to Managed Changes to UI

6. TestComplete Debugging

1. Debugging a Keyword-Driven Test
2. Methods of Starting a Debug Session Contents
3. Exploring the Debugger Windows
4. Call Stack
5. Locals

6. Watch List
7. Breakpoints

7. Event Handling

1. Using Events
2. Handling Unexpected Windows

8. Data Driven Testing

1. About the DDT Object
2. Creating Data Driven Keyword Tests
3. Adding DDT operations to a Keyword Test
4. DBTable Checkpoint
5. Creating a DBTable Checkpoint
6. Executing the DBTable Checkpoint

9. Web Testing

1. Web Application Testing
2. Understanding TestComplete's View of Web Applications
3. Internet Explorer Process Nodes
4. The Page Object
5. Object Browser's Hybrid Mode
6. Web Application Login
7. Web Stores & Checkpoints
8. Web Comparison
9. Web Accessibility

10. Web Services Testing

1. Overview of Web Services
2. Importing a Web Service
3. Using the Web Services Checkpoint
4. Calling Web Service Functions
5. Object Browser's Hybrid Mode
6. Web Application Login
7. Web Stores & Checkpoints
8. Web Comparison
9. Web Accessibility

11.Distributed Testing

1. About the Network Suite
2. Setting up a Distributed Test
3. Adding Hosts
4. Creating Jobs
5. Creating Synchronization Points

12.Manual Testing

1. About Manual Testing
2. Creating a Manual Test
3. Editing the Manual Test Description
4. Adding Steps
5. Running Manual Tests

13.Low Level Procedures

1. About Low Level Procedures
2. Recording Low Level Procedures

14.User Forms

1. Using the Designer
2. Calling User Forms in a Keyword Test
